# Project Name

**Title: Save Lives in Sudan: Emergency Medical Care, Food and Shelter for War-Affected Families**

- **Medical treatment: $75,000**
- **Food assistance: $65,000**
- **Shelter and clean water: $50,000**
- **Children and orphan support: $40,000**
- **Logistics and monitoring: $20,000**

# SAVE LIVES IN SUDAN

Emergency Medical Care, Food and Shelter for War-Affected Families

**Humanitarian Fundraising Campaign**

## Target: US$250,000

A transparent appeal to help conflict-affected people access urgent healthcare, nutritious food, safe shelter, clean water and child-focused support.

| | | |
|---|---|---|
| Medical treatment and emergency health care | $75,000 | 30% |
| Food assistance and nutrition | $65,000 | 26% |
| Shelter and clean water | $50,000 | 20% |
| Children and orphan support | $40,000 | 16% |
| Logistics, monitoring and accountability | $20,000 | 8% |
| **TOTAL** | **$250,000** | **100%** |

## Campaign Overview

Sudan continues to face a severe humanitarian emergency driven by conflict, displacement, food insecurity and disruption to essential services. The World Health Organization reported in April 2026 that around 34 million people needed humanitarian

assistance and 21 million lacked access to health services. WHO also reported that 37% of health facilities across the country were non-functional. The situation varies by location and can change rapidly.

The Food and Agriculture Organization's September 2026 country brief reported that about 19.5 million people were projected to face Crisis-level or worse acute food insecurity during February–May 2026, with several areas at risk of famine under a worst-case scenario. An IPC alert in October 2026 warned of growing famine risk in parts of Greater Darfur and Greater Kordofan.

## Why This Campaign Matters

Families displaced by violence may lose access to clinics, medicines, safe drinking water, food markets and secure accommodation. Children, older people, pregnant women, people with disabilities and people living with chronic illnesses can face heightened risks. Humanitarian assistance must be delivered impartially, based on assessed needs and safe access.

## How the Funds Will Be Used

**1. Medical treatment — US$75,000 (30%)**
Support essential medicines, emergency consultations, basic diagnostic supplies, maternal and child health services, first aid, referrals and treatment support through qualified health providers where access and safety allow.

**2. Food assistance — US$65,000 (26%)**
Provide emergency food parcels or appropriate cash/voucher assistance where markets function, with attention to household size, nutritional needs and local availability. Include nutrition support for vulnerable children and caregivers where qualified partners can provide it.

**3. Shelter and clean water — US$50,000 (20%)**
Support temporary shelter materials, essential household items, safe water access, water storage and treatment supplies, and basic hygiene assistance for displaced and otherwise vulnerable households.

**4. Children and orphan support — US$40,000 (16%)**
Prioritize child protection referrals, essential clothing and hygiene items, nutrition and healthcare referrals, safe learning or child-friendly support where feasible, and assistance to children who have lost parental care. Support should be needs-based and delivered with safeguarding procedures.

**5. Logistics and monitoring — US$20,000 (8%)**
Cover necessary transport, warehousing, local procurement checks, delivery coordination, safety measures, monitoring, feedback channels and financial documentation. Costs should be reasonable, documented and reported.
