Protect Nigeria’s Vulnerable Children

Emergency Food, Healthcare, Safe Shelter and Education by *Africa Hope Foundation*

Fundraising target: US$150,000

Campaign Overview

Children affected by poverty, displacement, insecurity and other emergencies can face overlapping barriers to survival and development: limited access to nutritious food, essential healthcare, safe drinking water, secure shelter and continued learning. This proposed campaign seeks to raise **US$150,000** to support vulnerable children and their families in selected communities in Nigeria through a coordinated, needs-based response.

The campaign will prioritize children and households identified through a transparent vulnerability assessment. Assistance should be delivered with qualified local organizations, health facilities, schools and community representatives, subject to verification, safeguarding checks and access conditions.

Why Support Is Needed

Nigeria continues to face serious humanitarian challenges. UNICEF’s 2026 Nigeria humanitarian appeal describes needs linked to conflict, displacement, malnutrition, disease outbreaks and disrupted access to essential services. It identifies nutrition, primary healthcare, water and education among key response areas. WFP also reports widespread acute food insecurity and displacement, with particularly severe pressures in parts of the northeast.

Important context: These national-level figures explain the wider humanitarian situation; they are not a verified count of beneficiaries for this campaign. The campaign’s target locations, number of children to be reached and delivery schedule should be published only after a local assessment and partner confirmation.

Proposed Use of Funds

Medical care	$40,000	26.7%
Food and nutrition	$45,000	30.0%
Shelter and clean water	$25,000	16.7%
Children and education	$25,000	16.7%
Logistics	$15,000	10.0%
TOTAL	**$150,000**	**100%**

How the Funds Are Intended to Help

Medical care — US$40,000

Support essential consultations, basic diagnostic services, prescribed medicines, referrals and urgent treatment for eligible children through appropriately licensed healthcare providers. Assistance must be based on clinical need and documented provider costs.

Food and nutrition — US$45,000

Provide nutritious food support and, where appropriate, screening and referral for children at risk of malnutrition. Therapeutic nutrition treatment must be provided only through qualified health and nutrition services.

Shelter and clean water — US$25,000

Help eligible families access safer temporary shelter, essential household items, safe drinking water and basic hygiene supplies. Water interventions should be checked for safety and suitability by competent providers.

Children and education — US$25,000

Help reduce barriers to learning through school supplies, learning materials, education-related support and referrals to safe learning opportunities. Activities should be coordinated with schools and relevant education authorities.

Logistics — US$15,000

Cover reasonable, documented costs required to deliver assistance, such as transport, storage, distribution, communications, field coordination and monitoring. These costs should be itemized and reported.

Implementation and Accountability

• **Needs assessment:** Identify target communities and assess children's needs before committing to beneficiary numbers.

• **Partner due diligence:** Verify local implementing partners, legal status where applicable, relevant experience, safeguarding procedures and bank/payment details.

• **Fair beneficiary selection:** Use clear vulnerability criteria and protect children's privacy. Do not publish identifiable images or personal details without valid informed consent and safeguarding review.

• **Procurement controls:** Obtain and retain quotations, invoices, delivery notes and proof of payment; document supplier selection and conflicts of interest.

• **Financial reporting:** Publish income received, expenditure by budget line, remaining balance and any approved budget changes.

• **Results reporting:** Report verified outputs and outcomes, with dates and locations, while avoiding unsupported claims or guarantees.

• **Complaints and safeguarding:** Provide a safe, accessible way for beneficiaries and community members to raise concerns.
