AFRICAN RELIEF & CARE FOUNDATION

Protect Ethiopia's Children: Nutrition and Life-Saving Support

A proposed humanitarian fundraising campaign

FUNDRAISING GOAL **US$150,00**

Children deserve a healthy childhood, proper nutrition and access to medical care. Yet food insecurity and humanitarian emergencies can place children and mothers at risk of acute malnutrition. This proposed campaign seeks to mobilize support for practical, community-based nutrition and healthcare assistance in Ethiopia.

Campaign purpose: Help vulnerable children and mothers access early nutrition screening, appropriate referrals, therapeutic nutrition supplies and support from qualified healthcare partners.

Campaign Overview

The campaign aims to support vulnerable children and mothers through coordinated services delivered with qualified local healthcare providers and humanitarian partners. Activities should be adapted to local needs, clinical guidance and the permissions required in Ethiopia.

Proposed Areas of Support

Nutrition screening and assessment: Support community and facility-based screening to identify children who may need nutrition support, with referrals for further assessment.

Therapeutic nutrition supplies: Help procure and distribute appropriate nutrition products through authorized healthcare channels and in line with clinical protocols.

Healthcare partner support: Contribute to service delivery costs, coordination and essential supplies for qualified health partners.

Caregiver education: Provide practical information for parents and caregivers on child feeding, nutrition, hygiene and when to seek medical care.

Transportation and storage: Support safe movement and storage of approved supplies, including basic logistics and inventory controls.

Monitoring and accountability: Track activities, spending, distribution records and results, and provide clear donor reporting.

Proposed Budget

Nutrition supplies	$65,000

Screening and assessment	$22,000
Healthcare partner support	$25,000
Caregiver education	$12,000
Transportation and storage	$12,000
Monitoring and administration	$14,000
Total Funding Goal	$150,000

Implementation, Safeguarding & Accountability

Implementation should be carried out only after suitable local partners, delivery locations, procurement arrangements and required permissions have been confirmed. Medical screening, diagnosis and treatment must be performed or supervised by qualified healthcare personnel. Nutrition products should be selected and distributed according to professional guidance.

Commitments to Donors and Communities

• **Transparency:** Maintain clear records of donations received, expenditure, procurement and distributions.

• **Child safeguarding:** Protect children's dignity, privacy and safety in all communications and activities.

• **Responsible storytelling:** Obtain informed consent before using identifiable photographs or personal stories; never imply that illustrative photographs show campaign beneficiaries.

• **Partner due diligence:** Verify the legal status, qualifications and capacity of local implementing partners before entering agreements.

• **Monitoring:** Report on outputs and expenditure using verifiable records, and explain any material changes to the budget.

A Call for Support

Your support can help connect vulnerable children and mothers with essential nutrition and healthcare services. By working with qualified local partners and reporting openly, this campaign aims to turn generosity into responsible, measurable assistance.
